

Frontend Engineer (React) (m/f)

At Kairion, we sit at the intersection of ecommerce, media & technology. We have developed a suite of groundbreaking ad formats for brands to leverage, and built a highly scalable application system to reach millions of shoppers in our network of leading online-shops in the perfect moment. All demands of this real-time application are tackled using the latest, cutting edge technologies. This is your chance to join a great company, in a great team, with great responsibility.

As our Frontend Engineer you will shape the flow of our ad technology together with a strong dev team which values your experience in JavaScript frameworks (React or Angular), and as well challenges you to excellence.

Your Tasks:

- Further development of a complex ad management software in JS frameworks / MVC / V
- Improving the front-end of the system
- Perform complete testing of web applications from a unit and system perspective
- Ongoing optimization measures and scaling of the distributed Kairion platform
- Agile approach, short release cycles, test atmosphere and a close cooperation with the product team
- Cooperation and dynamic exchange with experienced professionals of the Erlang, Node.js, NoSQL-Team

Your Skills:

- Experience and excellent know-how in React (or Angular with the intention to work in React)
- Strong experience in programming JavaScript (ES6)
- Ideally knowledge and experience in Redux, Webpack and in performance optimization of JS applications
- Ideally, knowledge of test-driven development, BDD, Clean Code, Jenkins and deployment processes
- Good English

If you have additional questions don't hesitate to contact us. We provide onboarding's for any business and tech topics you are interested in. Surely, our highly innovative product will set challenging tasks and let you take on a lot of personal responsibility. You will be backed up with a highly professional and motivated team which has a lot of fun at work.

Also, to maintain your edge, we offer biannual hackathons and a personal education budget in addition to an attractive salary and a modern workplace in the heart of Frankfurt.

Interested? Then we're looking forward to a short message:
